

Accessplan LMS

Accessplan LMS is an easy to use, Learning Management System that allows you to plan, manage, deliver and report on all aspects of learning and development via the internet or intranet.

Accessplan LMS efficiently manages the learning of employees or clients, helping to deploy a wide range of blended learning programmes whilst optimising resources, expenditure and reducing the costs of delivery and administration.

Accessplan LMS allows for management of classroom based training as well as e-learning courses and maintains a centralised training record of all learning activities. A full certification tracking system manages compliance, regulation and accreditation.

Accessplan LMS contains the same robust features of more expensive software, but at a fraction of the cost. Being a modular system means clients can take the components they need without paying for those they don't. AccessPlanit clients can have the sophistication favoured by big companies, yet, will enjoy the flexibility, simplicity and customisation of a learning management system that will not overwhelm or financially drain smaller organisations.

Our comprehensive system will benefit any organisation regardless of size, number of learners or budget.

Accessplan LMS is developed using the latest technology and delivered as a secure hosted, online service. You do not have to install complex programs, invest huge amounts in hardware or software or hire and maintain an expensive IT department. Your custom and secure Learning Management System can be deployed in weeks (not months), or sometimes days.

Accessplan LMS will deliver the following benefits:

- Reduced costs of delivering, managing and administrating learning
- Improved administrator productivity
- Training available anywhere 24 x 7
- Identify skills and competencies gaps
- Reduce compliance head aches
- Measure the effectiveness of training
- Rapid learning deployment across widely distributed organisations
- Easy customisation to fit with your organisation's culture and image
- Reduced cost and demand on internal IT resources
- Integration with courses and tools from a wide range of providers
- Integration with internal systems
- Free updates and maintenance

Accessplan LMS has the tools to manage:

- Instructor led courses
- E-learning including SCORM 1.2, 2004 and AICC objects
- Content including documents, video and audio
- On the job training and mentoring
- Accreditation, certification and compliance
- Skills, competencies and job profiling
- Performance and appraisal
- Management reporting
- eCommerce, finance and marketing
- Website integration

Accessplan xLMS

AccessPlanit customers have the ability to implement a specialised Learning Management System designed specifically for those companies providing external training. The xLMS (external-facing LMS) module is suitable for any organisation looking to train customers, suppliers, resellers, franchisees, sales agents or partners. It features a range of eCommerce, sales and marketing tools designed to help you increase training revenues and profits for customer and partner training programs. It drives increased registrations, facilitates online payment, helps convert leads to sales, markets your training products and promotes future course offerings.

Benefits

- Develop and deliver training to audiences outside of your organisation
- Increase sales revenue and registrations
- Develop Stronger customer relationships
- Convert more leads to sales
- Improved marketing and promotion
- Pay per use pricing model

Features

- Support eCommerce (integration with payment portals including PayPal and WorldPay)
- Manage invoices, credit notes and discounts
- Payment and reimbursement
- Integration with accounting packages
- Bulk marketing tools
- Customer relationship management
- Website integration and branded customer portals
- Create customer specific course catalogues
