

Composica

Composica is an advanced, web based e-learning authoring system. With its powerful web-based, WYSIWYG authoring environment, no programming is needed to create amazing interactive e-learning.

With its intuitive desktop 'look and feel', Composica makes it easy to create professional looking content in minutes. Composica brings you a world of creative instructional possibilities: alluring interactivity features, highly customisable e-Learning activities, exciting visual effects, dynamic navigation options and clever assessment capabilities.

Content authors, content experts and reviewers alike, will appreciate how easy this content authoring tool is to use and how easy its compliments group work and knowledge sharing.

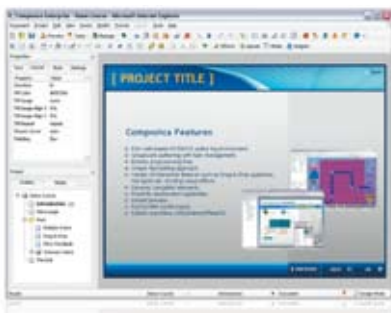

Composica offers full control over the way elements appear and behave. Content authors are never limited to a set of predefined templates or styles. Every element on the screen can be visually customised using a responsive properties grid.

Composica gives everything e-learning development teams have been asking for to create high quality, stimulating e-learning courses in minutes: The power of the web, a desktop-like user interface, a collaboration friendly environment, creative freedom - 100% programming free, and a comprehensive library of assets, templates, themes and interactive elements.

Composica can be deployed using our hosted service model saving you time, money and effort. We take the technical hassle out of your hands giving you more time to deliver great e-learning material.

Key Features and Benefits:

- Rich web-based WYSIWYG authoring environment
- Intuitive and easy-to-use - 100% programming free
- Web-based – 'zero installations or downloads'

- Web 2.0 integration including blogs, comment, YouTube, Google
- Exciting visual effects
- Dynamic navigation elements
- Powerful assessment capabilities
- Import PowerPoint presentations
- Instant preview
- Full SCORM conformance
- Publish anywhere, LMS/online/offline/CD

Composica

Easy web based authoring

Free yourself from static templates and predefined styles. Composica lets you choose, change, add and modify at will, making every element of every course you create truly your own.

- **WYSIWYG authoring environment**
- **Instant preview and editing**
- **The comprehensive library of assets, templates, themes and interactive elements**
- **Variety of sophisticated interactivity features, e.g. Drag & Drop, Fill-ins, Hot Spots**
- **Dynamic and powerful visual effects, navigation elements and assessment capabilities**

Authors using Composica are reporting a major decrease in development time, of up to 70%.

Collaboration

Authors, designers, subject matter experts and reviewers can access the centrally-located project using a web browser, and work simultaneously in real-time collaboration with the others 24 x7.

- **Sophisticated unique groupware environment**
- **Real-time simultaneous teamwork**
- **Resource sharing**
- **Project management**
- **Built-in task system and task reports**

Reusability

Composica saves you hours of time and effort by letting you save, catalogue and reuse any element of every project you create. Composica stores learning objects, content, styles, navigation rules and graphics separately so the 'look and feel' of each of your courses can be changed or used for other courses even after the content has been organised.

- **Reusable learning objects, assets, themes and widgets**
- **Central repository**
- **Design and logic inheritance**

Mind Games

Composica's Mind Games module expands your assessment repertoire to include powerful 'play and learn' testing modalities with the visual flair and flexibility that have made Composica an e-Learning industry hit. Easily any of its competitive, engaging, rewarding and easily adaptable games to your e-Learning projects.

Integration

Composica is fully SCORM compliant. It integrates seamlessly with any standard Learning Management System to pass on performance data.
